

What's So Great About a Web Application?

Faster, Easier Installation

A browser connected to the internet; lower cost hardware is fine

Saves IT Time & Expenses

No installations, No servers, No backups... We handle all that for you
It saves Time & Expenses for MIS/IT support.

Data is Current All the Time

Available in real time anywhere* (home, office, a public library, a government building, even your favorite coffee shop)

Ideal For Remote Offices

Run in multiple locations with a broadband internet connection

Suited to Wi-Fi Campus

Requires only a secure login/password for each individual user

Let's Talk About Freedom...for you!

After a long day of visits you stop by your favorite coffee shop, order a latte and a bagel, bracing yourself for the trip back to the office to finish charting. As the Barista steams the milk for your latte, you picture yourself juggling your bagel and latte in one hand as you heft your bags with the other. Climbing the stairs, heading down the corridor, clutching your latte and bagel to your chest the whole time, like Anne Hathaway running errands for her boss in *"The Devil Wears Prada."* You zigzag through the labyrinth of office cubes and finally reach your desk. Falling into your chair, you vow to never re-live this particular day.

The Barista's announcement, "latte up" and a strong smell of coffee beans act as smelling salts to reawaken your consciousness; if only you could stay here, sit down for a moment in that comfy leather chair, catch your breath, rest your feet on the hearth, and finish your charting right here... *Well now you can!*

With *Nightingale Notes* your clients' charts are available anywhere, anytime. You don't need to go back to the office, even to check out a chart. Just go to your favorite spot, any spot,* log in to *Nightingale Notes* and start charting. As you work, your notes are saved, in your agency's secure, HIPAA compliant, database. Before your cup is completely empty, your daily activity log is completely filled, done!... Just in time to relax, get a refill, do some light reading and then off to enjoy a much deserved dinner with friends!

*With access to an internet connection.

Here's what users are saying...

"Nightingale Notes—is changing the whole way we look at Public Health... in Washington."

"I love the clean look."

"It looks good! Nice features. I like the icons and the screens."

Eight reasons why others have chosen to document with us.

- **Laser Sharp Accuracy**
- **Efficiency Revolution**
(slash charting time by up to 50%)
- **Precision Care Plans**
(best practices; created, tested and refined by seasoned experts)
- **Rock Solid Consistency**
(nurse to nurse, visit to visit, client to client)
- **Flexible** (build it to fit your needs)
- **Explicit Outcomes**
(in three critical areas, Client Knowledge, Client Behavior and Client Status)
- **Robust Reporting**
(both Standard and Custom reporting functions are included)
- **Integrated Electronic Billing**
(pulled directly from daily activity logs)
- **Cost Effective** (Shhh...can you keep a secret? Our prices are just one of our competitive advantages, but I don't want the 'other guys' to find out the details! Can we discuss this offline sometime?)

Documenting Public Health Encounters For Almost a Quarter of a Century!

Who are we? In Minnesota, 55 of 87 County Public Health Departments have selected CHAMP as their Community Health Software vendor of choice. In neighboring Wisconsin, **40 percent of the counties**, as well as several cities, have also chosen CHAMP Software.

When you consider that Minnesota is nationally recognized as one of the forerunners in promoting excellence in community health that says a lot about their overwhelming support of CHAMP Software!

Nightingale Notes is a comprehensive nursing management program, that integrates electronic batch billing for Medicaid, Medicare, commercial insurance and private pay.

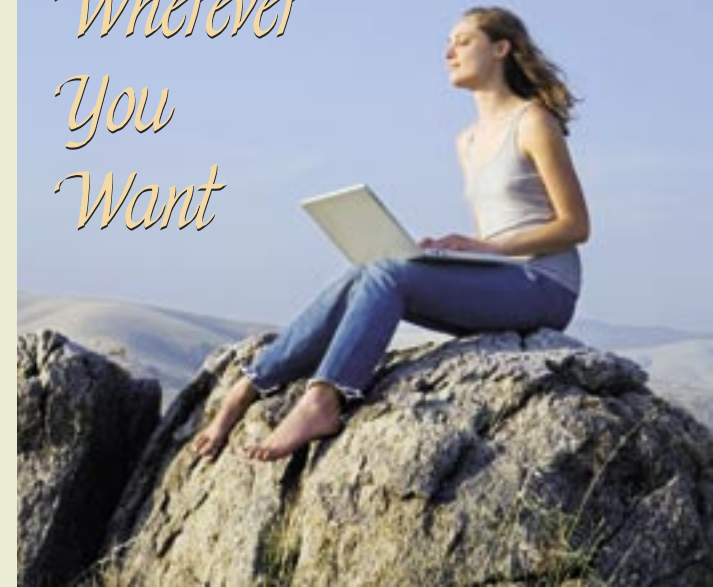

Nightingale Notes can be used to document home visits, clinic visits, phone calls, case management notes, progress notes, vitals, and daily activity logs. Custom tabs allow collection and storage of a host of custom measurements. This custom data can also be tallied in any report. Your staff can enter notes or pull reports anytime, from anywhere, with this powerful web-based tool!

Has anything you've read so far captured your interest? Are you ready to discuss your needs, your problems and your hopes for the future? Call us now, we are ready to listen.
